### The ABCs of Land Records

Land records are one of the most important genealogical tools. Understanding the terms make them easier to use. The goal of this lecture is to explain some of the terms and make your land records research more successful.

Glenda Gardner Lloyd is a fourth generation Californian. She grew up on a cattle ranch in northeastern California and attended a one-room country school. She received her BA from the University of California, Santa Barbara and her MA from California State University, Sacramento. She taught elementary school and worked as a reading specialist for thirty-eight years. Glenda helped organize and served as the first president of Root Cellar, Sacramento Genealogical Society. She has taught genealogy classes through San Juan Adult Education for many years. She participates in local seminars for the California State Archives, the Regional Family History Center, the Sacramento City Library, and does workshops for many local societies. She has lectured for the Salt Lake Institute. Genealogy is her hobby and her passion which she hopes to share with all of you.
